100% online 8-week courses

## MBA COURSE LISTING

### High-Performance Teams

Infused with theories and principles of contemporary leadership, this course is designed to help you polish and develop leadership skills necessary to build an effective team.

### Adaptive Leadership and Change Management

Organizations are faced with constant and rapid changes in their local and global environments. As a leader, you'll learn how to improve your skills in resiliency, adaptation and innovation.

### Coaching and Mentoring in the Workplace

Coaching is a trending competency in progressive organizations. Develop executive coaching skills at the personal and managerial level that you easily deploy for variety of decision-making styles.

### Conflict Management

Conflict can be positive and negative, depending on how leaders manage. Become acquainted with strategies that engage conflict in constructive ways for the organization and the people you communicate with.

### Practical Economics

Explore aspects of the global economy, including resources acquisition, development, global shocks, international business and trade for today's interdependent world.

### Data-Driven Decision Making

This practical managerial decision-making class will incorporate analysis of financial statements and accounting metrics to drive financial, marketing and operational decisions.

### Managerial Accounting

Provided managerial accounting tools will help you better understand how to contribute to managerial decision making, planning and controlling processes of management.

### Financial Analysis

Acquire working knowledge of financial analysis principles and practices, including cash flow and budget analysis, forecasting and financial risk management.

### Project Management

Contemporary business leaders are often tasked with leading the execution of projects. This course will demonstrate techniques for project design and delivery.

### Contemporary Marketing

This course will introduce you to strategies for turning knowledge of consumer behavior into actionable plans designed to improve and increase operational performance.

### Legal Environment

Analyze legal dilemmas and make decisions that mitigate risk while honoring corporate ethics.

### Strategic Business Analysis and Management

Learn environmental and competitive analysis with foresight on economic, social, legal, political, technological and competitive factors.
