

# Leadership Accelerator

*Practical. Relevant. Applied.*

## Invest your time and training dollars wisely.

When you promote your best staff to supervisory roles, they have already demonstrated that they possess the technical skills needed to be successful. The **Kelley Center for Entrepreneurship** can help them develop the leadership skills that will make their transition to that next level effective and efficient. Our **Leadership Accelerator** program is geared for new managers, as well as those with years of leadership experience. Enrollment is limited to 9 participants per session.

## Program Content

### Leadership and Communication

Develop your entrepreneurial mindset, enhance emotional intelligence, and refine communication skills to strengthen teamwork and leadership.

### Coaching in the Workplace

Develop coaching skills, key techniques and core elements to build stronger, more effective teams.

### Transformational Conflict

Shift your approach to conflict, embrace it positively with others and use it as a tool for organizational growth.

“This course gets people out of their comfort zone and engages them in understanding the ‘why,’ and then most importantly, practicing what they have learned. I strongly recommend this program for new managers. It is also a great opportunity for experienced managers looking for new ideas on how to manage people from the way it has always been done.”
